1. [REDACTED]
2. The depot at Mixdorf was taken over by the Soviets on 7 October 1952.
3. The containers were continuously filled with gasoline which arrived by rail.<sup>2</sup>
4. The containers, with a capacity of 24 cubic meters each, were arranged in groups of 4, except for group No 32, which consisted of 5 containers.<sup>3</sup>
5. The telephone exchange consisted of a switchboard in the main guardhouse and 18 call boxes. Alarm, can be given from each watchtower, and there is a siren in the guardhouse.
6. Fuel shipments sent to Mixdorf from Grosskorbetha in October 1952 included: 24 tank cars with 401 tons of gasoline, [REDACTED] on 17 October; 18 tank cars with 305 tons of gasoline, [REDACTED] on 20 October; and 19 tank cars with 301 tons of gasoline, [REDACTED] on 22 October.<sup>4</sup>

25X1. [REDACTED] Comment. For location sketch, see Annex. The information seems credible. The sketch is of special interest, as it is assumed that other fuel depots such as the new depots at Strassgraebchen-Bernsdorf, Radensleben and Biesenthal are constructed according to the same pattern. According to this assumption, the depots would have a capacity of about 3,000 metric tons each. One Major Millezub (fnu) is reported for the first time. The name has probably been misspelled.

25X1. [REDACTED]

25X1. [REDACTED] Comment. See sketch. The arrangement of containers is also known from other fuel depots.
